## YOUR CHAIR, YOUR WAY... EACH CHAIR IS INDIVIDUALLY MADE TO ORDER

**Six Backs • Seven Seats • Thirteen Different Arms...**

Most can be interchanged easily to meet the individual preferences or needs of your diverse workforce.

### PICK YOUR:

#### Mechanism

BodyBilt has three different mechanisms – the J, the K, and the R – that tilt and position your chair to meet your individual needs.

#### Back

We offer six different back sizes that provide back support positioned just right for you. Check out the optional S'port Ridge™ thoracic support.

#### Seat

We offer seven different seats which are designed and contoured to fit the individual to reduce seated pressure.

#### Arms

Choose from thirteen arms that provide ergonomic support and a full range of movement.

## Executive SEATING

# BODYBILT®

## Signature Executive Series

BodyBilt® Ergonomic Seating by ErgoGenesis is further highlighted by its Signature Executive Series. This series exudes confidence and understated elegance in any setting – traditional, contemporary, art deco, or provincial. The Signature Executive Series offers chairs with chrome and upholstery features that provide the perfect balance between ergonomic function and timeless design to communicate brilliance to those on the outside looking in. Available only in leather or ultraleather upholstery.

### Fore-Aft Neckroll

Allows you to adjust your chair to your level of comfort through height and depth adjustability.

## OPTIONS

**1. Chair Base**  
Bases come in Chrome, Mahogany, Natural, Black, and Powder Coated.

**2. Stitching Options**  
Gives upholstery added softness with impressive styling. Choose between (a) Ease Stitching (b) Diamond Tufting (or) Smooth Stitch (not shown)

**3. S'port Ridge™**  
Vertical foam provides exceptional mid-back (thoracic) support while promoting improved posture.

**4. Air Lumbar™**  
Lower back support is crucial to a healthy seated posture. The Air Lumbar™ can be inflated to adjust the firmness of the backrest.

**5. Seat Slider Adjustment**  
Adjusts the seat 2.5 inches forward and backward. Can be adjusted while sitting in the chair.

**6. Arm Options**  
Pivot Arms available with Mini S'port™, Super S'port™ and S'port™ versions. Upholstered Arms The perfect balance between ergonomic function and design.

**7. Linear Tracking™**  
This dynamic armrest supports your arm through a full range of motion.

## Executive SEATING

Available with the R Mechanism  
Another BodyBilt® Innovation

Bi-synchronous tilt mechanism with anti-kick tilt lock and – get this – an independent back angle adjustment and seat slider. Provides easy access to controls, adjustability as you like it, and smooth, easy rocking!

# Executive SEATING

# ERGONOMICS

The laws of work:  
**FITTING THE TASK TO THE WORKER**  
**INTERFACE OF MAN AND WORKSPACE**  
 No matter how you define it,  
 ergonomics plays a big role in seating.

The **adjustability** of the chair allows the worker to position the chair into the exact supportive posture desired.

BODYBILT®

## HIGH-BACK COMFORT

<p>J2406</p>  <p>#6 Seat – Minimally contoured seat designed for petite individuals.</p>	<p>J2408</p>  <p>#8 Seat – Minimally contoured seat designed for moderate sized workers.</p>	<p>R2507</p>  <p>#7 Seat – Moderately contoured seat, our most popular, fits the largest percentage of workers in size, weight and frame.</p>	<p>J3406</p>  <p>#6 Seat – Minimally contoured petite seat designed for smaller statured executives.</p>	<p>K3502</p>  <p>#2 Seat – Deeply contoured seat that distributes seated pressure without creating pressure points.</p>

## MODULARITY COMFORT ADJUSTABILITY

**Six Backs • Seven Seats • Thirteen Different Arms...** most of these Executive options can be interchanged easily to meet the individual preferences or needs represented by a diverse workforce.

**What Makes A Chair Comfortable...** adjustability is crucial to ensure a proper fit which results in the effective weight disbursement needed to reduce seated pressures.

**12-Point Posture Control™...** the 12-Point Posture Control™ system reduces tension in key muscle groups by up to 75% – minimizing stress while maximizing productivity.

Ergonomics seeks to provide comfort for the worker.

### Who needs comfortable, task-driven seating?

YOU DO, IF YOU SPEND MOST OF YOUR WORKING HOURS SEATED. At BodyBilt®, we create and produce customized chairs that are scientifically engineered to better position you in the workplace and home office, minimizing the physical stress that results from limited mobility and repetitive motion. We've taken ergonomics "from outer space to the workplace," as our products are designed to help seated workers mimic the same comfortable, stress-free posture their bodies would naturally assume in a zero-gravity environment.

While sitting may be good for business, it's usually not good for bodies. Whatever the work environment, every

worker who performs most of his or her job tasks in a sitting position is at risk for injury. The U.S. Department of Labor attributes more than 60% of all occupational illnesses to repetitive motion disorders and 40% of recorded worker absences to back injury.

**Our chairs combat the counterproductive effects of long hours seated at work with three integral features:**

**Modularity** – BodyBilt chairs offer 26 different modular components (6 backs, 7 seats and 13 different arms) which can be configured to meet individual preferences and specific task needs.

**Adjustability** – Every BodyBilt chair utilizes a patented 10 and 12-Point Posture Control™ system to reduce

tension in key muscle groups by up to 75% for minimum stress and maximum productivity.

**Comfort** – BodyBilt's modular, adjustable seating ensures a proper fit for every body type, resulting in effective weight distribution and reduced seating pressure.

#### Highly-Ergonomic Design

BodyBilt provides exceptional back support and comfort, adaptable to almost every body type and practically any task. Ideally suited to desktop intensive tasks, BodyBilt chairs are frequently selected by those in computer-intensive office environments from law firms to banks and from medical offices to manufacturing plants. Because no two workers and their tasks are the

same, our chairs enable complete customization and user control with 26 component options and up to 12 adjustable ergonomic features. Every BodyBilt chair is delivered with a 30-day satisfaction guarantee and the kind of customer support that makes repeat customers and referrals the norm, not the exception.

#### Sustainability

**Sustainability refers to conserving an ecological balance by avoiding the depletion of natural resources.** Our goal at ErgoGenesis is to build our products in the most environmentally friendly way possible. By using foam made from soybeans, upholstering with fabrics that contain recycled material, and by producing renewable products

with a longer lifespan, we are able to contribute in a meaningful way to our customers and our environment.

#### What are our customers saying about BodyBilt Chairs by ErgoGenesis?

*"This chair is amazing! I now have little discomfort throughout the day; before, I felt discomfort continuously."*

*"When you buy this ergonomic chair, you are paying for quality. This chair is worth every dime! Try one for yourself and see the high level of comfort that your body is waiting to attain."*

*"I no longer have to stand for long periods of time until pain subsides. I truly believe I can sit all day now with no more discomfort. I hope to sleep better at night as well."*

ErgoFusion™ is a collection of ergonomic workstation tools from ErgoGenesis that is designed to complement BodyBilt® seating solutions. Each tool is made for the tasks we all perform each and every day. ErgoFusion™ enhances adjustability. We all face the same obstacle – not all people are the same shape and one size does not fit all. This suite of ergonomic products offers you a completely tailored workstation including:

- Keyboard Trays & Accessories
- Workstation Corner Makers
- Document Holders
- Desk/Work Surface Risers
- Flat Screen Desk Mounts
- Footrests
